

Kimberley Footballers Hand Out Bumps Galore to Coleman

Several Players Require First-Aid as Result of Heavy Body Checking

Crows Nest Pass league standings.

	F	W	L	D	P
Kimberley	6	5	1	0	10
Coal Creek	6	4	2	0	8
Coleman	5	3	2	0	8
Cochin	5	3	1	0	6
Fernie	5	3	2	0	6
Michel	5	2	2	1	5
Bellevue	5	1	3	1	3
Blairmore	5	1	4	0	2
Hillcrest	4	0	4	0	0

Coleman suffered the drags of defeat Saturday evening when Kimberley won on the local ground by a 3-1 score.

Kimberley played the better football and on the run of play were the better team being for the most part on the offensive. However, they had to take advantage of two penalty kicks before they could snatch a victory.

Kimberley is a big strong team who use their weight advantage a little to excess, there being no necessity for the extent to which they went. No less than five players found it necessary to receive attention from the trainers. Jock Anderson played a good game on the Coleman forward line. The Coleman defence played a sterling game to within fifteen minutes from time when they gave way under Kimberley's continued assaults on goal.

The first half opened with Kimberley making a raid on Coleman goal which was quickly cleared and the ball sent towards the Kimberley goal. A Kimberley back handled the ball in the penalty area but the referee failed to blow the whistle and this slip-up on the part of the referee was to stand out glaringly before the end of the game. After three minutes of play Brown scored for Coleman when the goalkeeper left his goal in an effort to intercept the ball. Play was fairly even for the next thirty minutes and the pace set was fast with a good brand of football being displayed. After 35 minutes of play Kimberley forced the play into Coleman's 18 yard line where Brown of Kimberley handled the ball which went unseen by the referee and in the excitement of the moment J. Anderson also handled the ball, lost his balance and fell on top of it, the referee blowing his whistle and pointing to the penalty spot. A heated argument took place before Coleman finally stood back for the spot kick to be taken, Jones scoring. With the score tied up, the teams played strenuously to get ahead and bumps were plentiful, each team handing out stiff body checks. The first half ended in a 1-1 tie.

The pace set in the second half was much slower, Kimberley were now having an edge on the play and for spells had Coleman bottled up in front of their own goal. Greenland tricked his way through

Title Boxing Matches Here on Dominion Day

Prospects for the championship boxing card promoted by Frank Barringham on July 2, following the Dominion Day program of sports, appear to be good. The boxers he is bringing in will clash for Western Canada titles, and the advance sale of tickets is being taken up, so that a big house is looked for at this holiday program. This will be the best card he has put on, states Barringham.

No Quorum for Miners Meeting

A regular meeting was called of the Coleman Miners Association for Sunday last, but it was cancelled owing to lack of sufficient attendance. A letter had been sent in by the Board of Trade suggesting that committees be appointed to work in conjunction with the town committee for the annual Dominion Day sports. Dave Gillespie and H. T. Halliwell were president and secretary last year, but this year they have requested that new officers and committees be appointed. As there is only a month to arrange, action should be taken immediately. It is the one day when Coleman celebrates, and this year should be just as good or even better than ever.

Police Officer Passes On

Another familiar figure in the mounted police of earlier days comes to the end of the long, long trail. Ex Commissioner Cortlandt Starnes passed away at his home in St. Hilare, Que., at 70 years of age, 45 of which were spent in the police force. 13 years of that time were spent at Macleod, formerly the headquarters of the force.

The Michel-Natal Black Hawks defeated the West Coleman Cubs on Victoria Day 13-5. The West Coleman Co Eds saved the day however, when they came through with a 6-4 win over the Michel-Natal Scarlet Runners.

The defence missed an open goal from four yards out when he shot wide. A few minutes later H. Brown headed a fast one over the bar. Coleman broke away and forced a corner; Hotchkiss had to pull off a good save to keep the ball out. After forty minutes of play Kimberley forced the play into Coleman's penalty area where Burrell accidentally handled the ball, which resulted in another penalty, and another goal. This last break of the game completely disorganized the Coleman team and three minutes later Kimberley rode rough shod over Coleman to put in another by Greenland. Final score Kimberley 3, Coleman 1.

Line up Coleman Ford, Griffiths, Burrell, Gardiner, J. Anderson, Park, W. Anderson, Fraser, Joyce, Jock Anderson, F. Brown.

Kimberley: Hotchkiss, Jones, Gould, McFarlane, Faulds, McLeay, Nieholaz, G. McFarlane, H. Brown, G. Jones, Greenland.

Referee, P. McGovern.

Snap-Shots on Well-Known Citizens

WILLIAM H. CHAPPELL, Blairmore, active in Pass athletic and sport activities for many years, secretary of Pass School Trustees Association, prominent in fraternal organizations and all other activities which help to make a town a bigger and better place in which to live. Hobby at one time was playing cricket, which he says must not be confused with tiddley winks. Always to the fore when there is entertaining of visitors to be looked after, and a good organizer to put things over. Known as "Bill," he has helped to put Blairmore on the map, and can always be counted on to lend the helping hand to any worth while effort. In short, a good all round citizen. For many years he has been chief accountant for West Canadian Collieries, and has framed the first pay cheque he received of 26c. Came originally from England, but it was so many years ago you couldn't tell it from his accent, though he still reads with lingering affection copies of English newspapers. Almost an encyclopaedia in his knowledge of Blairmore and other towns of the Pass, so that many have got into the habit, when in doubt of anything of historical interest, of asking "Bill."

Musical Competitors at Lethbridge

Congratulations are due Coleman contestants in the musical festival at Lethbridge. Wilona Taylor was awarded 87 points in mezzo soprano class; Eileen Richards 87 for Contralto voices under 19; Freda Ambrosus was third in pianoforte and eighth in singing in a group of 38 competitors. One of Miss Chadon's pupils was awarded second place.

First place was awarded to W. J. Harris Sunday school orchestra, which included bright young players from Coleman, Michel Natal and Bellevue.

Pertinent Question

Truck drivers paying licence to the town ask if trucks coming in from outside points can pick up freight in town for delivery elsewhere. That's something for the council or the town policeman to decide. There are many unfair angles in truck competition, yet merchants depending on coal business apparently overlook it, not realizing how much they prejudice their own interests.

Surprise Party

A surprise party, arranged by Mrs. T. Higginbotham and Mrs. Geo. Morgan was held at the home of Mr. and Mrs. Robt Evans on May 23, it being Mr. and Mrs. Evans' 25th wedding anniversary. Above 30 friends assembled to extend their best wishes. Court whist was played, the prizes going to ladies, Mrs. J. Nash and Mrs. J. Derbyshire; gents, Mr. Chris Rogers and Mrs. J. Yates.

Supper was served by the hostesses, and Mrs. Higginbotham on behalf of the friends present, presented Mr. and Mrs. Evans with a beautiful silver flower basket filled with carnations. They replied by saying that it had been a great surprise to them and thanked their many friends for their thoughtfulness in remembering them on this occasion.

The party broke up by singing "Auld Lang Syne" and "For They Are Jolly Good Fellows."

Mr. and Mrs. Sam Wilson and children arrived by car from Idaho this week and are the guests of Mr. and Mrs. F. Patterson.

\$25 and Costs for Stealing Electrical Current

For stealing electrical current, a West Coleman householder was charged before J. E. Gillis, police magistrate, in Coleman court on Wednesday morning. The case was prosecuted for Coleman Light & Water Co. Ltd. by R. F. Barnes, company solicitor. Accused pleaded guilty.

The magistrate pointed out that in view of the prevalence of this offence, and the difficulty of detecting same, he would impose a fine of \$25 and costs.

The company has a number of places under observation, and in this instance obtained definite proof of the offence being committed.

COLEMAN HOMING SOCIETY

Result of race from Bow Island to Coleman. Distance 141 miles. Birds liberated at 7.15 a.m. arrived:

J. Sudworth	883 7 yds
T. Jackson	833 4 yds
W. Harrison	833 7 yds
W. Pryde	833 0 yds

C. Makin	824 6 yds
E. Raymond	823 8 yds
F. Beddington	822 7 yds
J. Class	820 9 yds

Prizes donated by Coleman Hardware and Mr. Webster.

ST. PAUL'S UNITED CHURCH

The call of the outdoors is very insistent these fine spring days, but let us not "forsake the assembling of ourselves together" in the Sanctuary of God. To help in these hot days the minister will conduct the services one hour only.

On Sunday, June 3 the minister will be in charge morning and evening. The junior choir will lead the singing and the minister will preach on "Man Shall Not Live By Bread Alone". Sunday school at 12.15. Evening worship 7 p.m. The subject will be "Christ and Life Values".

Coleman Defeats Hillcrest in Baseball Game

Playing before a fair crowd on Monday evening, Coleman Red Sox won their first game in the Crows Nest Pass baseball league defeating the Hillcrest nine 5-3.

Hillcrest had an edge on the play until the last half of the sixth when they held a three run lead. Gate started Coleman off on their winning rally when he knocked out a three bagger, Kubica hitting a single to bring him home. Kubica was brought home by a bit from the bat of Atkinson to finish the scoring for the inning. Coleman scored three more runs in the seventh to hold their opponents scoreless.

Line up Coleman: Richards, catcher; Gate, pitcher; Rypien, Atkinson, Pattinson, Kubica, Haysom, Joyce, Fraser.

Pete Sharp suffered painful injuries to his face on Saturday when a low pressure air line burst just as he was leaving the entry at McGillivray mine. The force of suddenly escaping air caught him in the face, blowing his cap and electric lamp from his head and forcing small particles of gravel and coal dust into his skin. He was given an anesthetic at the hospital and his face cleaned up. Seen on Monday, his face appeared like a man's who might have been chasing a rat through a keg of nails. As a result, Pete has to take several days rest from work to allow the injury to clear up.

IN MEMORIAM

In Loving Memory of my dear husband, and our father, David Gardiner, who was killed in McGillivray mine on May 31, 1932.

A sudden change, at God's command he fell. He had no chance to bid his loved ones farewell. Affliction came without warning given. And bid him haste to meet his God in Heaven.

—Inserted by his sorrowing wife and family. Cowdenbeath, Fife, Scotland.

Coleman Schools Make Good Showing at Inter-School Sports

Mary Snider Awarded Four Firsts and Others Prominent in Events

After remaining out of inter-school sports for several years, Coleman came back strong in the annual meet held on Monday at Blairmore. In the morning they piled up 62 points, and showed up creditably in the afternoon. The final results in points gained was not known at this time was written, but Coleman was hopeful of capturing the shield awarded to the school scoring the highest number of points.

It was a very hot day, and dust at times on the field caused some discomfort, but teachers stuck to the task as judges, while the redoubtable "Cap" Rees, of Blairmore, despite his 87 years, showed that he could be young again by volunteering to act as official time-keeper.

Obstacles To International Agreement

Obstacles to international agreement are many and various; so many, so various as to baffle the vision of the conferees and defeat the ends sought. Particularly is this true when a complex of nations is represented round the conference table. Despite the good intentions of conferees, the high sentiments they express and the noble purposes they proclaim, invariably dissonance interrupts the even tenor of the proceedings, divergent points of view protrude themselves and, with each interruption and each protrusion, practical agreement becomes the more remote.

The conflict of opinion appears less with regard to the general objective sought, as with regard to the method by which that objective can be reached. In the ultimate analysis, political rather than practical issues prove the stumbling block.

These thoughts are occasioned by the succession of disasters which has befallen world conferences held for perfectly laudable purposes during recent months. The League of Nations itself, perhaps the greatest agency for world co-operation yet devised, has suffered considerable loss of prestige through recurrent manifestations of local interest, local jealousies, pride and susceptibilities. In matters such as the drug traffic, in which public rather than political and national considerations are paramount, the League has been able to take decisive action and render invaluable service. But where political and national interests and prejudices are involved, directly or indirectly, its decisions have been of less unanimous acceptance. In fact, they have seldom been effective because they have been largely ignored.

In spite of the League's body of opinion supporting it, where matters of national significance have been broached, the nations involved have proved a law unto themselves, using the simple expedient of withdrawal from the League as a means of asserting their right to go their own way. Disarmament questions have brought prominently into the foreground this conflict of national viewpoints, and this insensate desire for autonomy in matters affecting the peace of the world. There can be little question that world opinion, generally, favors disarmament on a sane and safe basis. It is equally true, however, that there is sharp clash of opinion as to what the basis should be and as to the methods whereby it should be undertaken. World disarmament conferences have proved futile, so far, in spite of the unanimity voiced by national spokesmen as to its desirability. All nations, it appears, are in favor of disarming—provided the other fellow does it.

Strange as it may seem, while world conferences on the question are disheartening failures, the same can not be said with respect to understanding on the subject between particular nations. Bilateral disarmament agreements appear easy, by comparison. Where two or three nations are involved, amicable solutions come readily to hand. Britain, for example, has little difficulty in reaching understanding with Italy, Italy with France, and so on. Even with Germany amicable negotiations are possible. Yet, when Britain, Italy and France sit around a conference table with Germany, it becomes immediately impossible to reach agreement on the same objective and on the same means of achieving that objective.

This is not to say that Germany is entirely at fault, or that the blame attaches to any particular one of the parties to the conference. It is apparently due to the complications which arise with every addition to the conference. Compromise as between nation and nation is easy; between three nations it is a little more difficult, but less difficult than when four nations are involved. Perhaps, then, the real solution is to be found in multiplying bilateral disarmament agreements until the whole world is involved and all the nations are committed to peace.

The same course may be found the ultimate solvent of the world wheat problem. Apparently, the London Wheat Agreement has foundered on the shoals of national aspiration for, as this is written, the Argentine has virtually negated the good work accomplished in the London conference, and the United States, in reprisal, is threatening unlimited production and the dumping of its surplus on the markets of the world.

The London conference resulted in what has been acclaimed as a unanimous agreement representing the first really co-operative arrangement yet reached by the nations of the world. It was not, however, a finite thing, in itself. It left certain important decisions for later consideration, particularly the matter of minimum prices. Experts met at Rome to discuss prices in accordance with the terms of the agreement, only to be met by objections from the Argentine and the United States. The Argentine, on the one hand, created a 40,000,000 bushel in her quota allotment. Having already virtually exhausted her export quota for the year as set in the London Agreement, the Argentine demanded an additional 40,000,000 which could only be given at the expense of other great exporting countries, including Canada. The price conference, however, reached certain tentative conclusions which were submitted to the government involved.

The next stage in the proceedings was the London conference on prices to amend or ratify the decisions of the Rome discussions. Here again, clash of national interests proved a handicap. Doubts have been raised whether or not price-fixing by a central body is a sound practice to adopt. In fact, British grain men have been emphatic and outspoken on the subject. The head of the London grain exchange had no hesitation in stating that the representatives of the various nations were amiable gentlemen "but they knew very little about wheat." With warnings against price-fixing, demands for increased quotas, and threats of unlimited production, the whole agreement appears in jeopardy. Obviously, the complexity of national interests is accentuated in conferences on so large a scale as that at London. Perhaps (he it repeated) the solution may be found in a series of bi-lateral agreements involving all interested parties.

Used Sign Language

Sign language was used by members of the Western Canada Association of the Deaf as the medium of presentation at a unique concert in Saskatoon. A short play, given by school pupils, depicted early education of the deaf in this country. In addition, "O Canada" was rendered in the sign language.

Phonics For Dinner Guests

Guests at a telephone service dinner at Grosvenor House were able to talk to friends at the other end of the dining hall without leaving their seats, telephones being installed on the tables for this purpose.

Ordinary printers' ink is used in making fingerprints.

Health For Young Girls

Happiness For Tired Women

Thousands of women become tired out and run down, become thin and pale, and profound weakness makes life a burden.

The whole outlook of life is changed when the nervous, sick headaches, the sleeplessness, the spells of dizziness, of weakness and discouragement, and the tired, languid feelings disappear with the use of Milburn's H. & N. Pills. They tone up the nerves, enrich the blood, and bring the health back to normal again.

"Britain Of The East"

Story Of Japan's Progress And Development Reads Like Romance

Whatever may be said of the aggressiveness of Japan in the Orient, it must be acknowledged that she deserves the designation, "The Britain of the East." Never in the history of the world has any of the backward nations made such gigantic strides forward in the path of civilization as has Japan.

The story of her progress and development reads like a romance. From the very time when she reformed her government and established democratic institutions she has gone forward in the path of educational and scientific progress and in industrial development at a remarkable rate. Her educational and scientific institutions are among the finest in the world. Moreover, her army and navy have reached a stage of development that is second to no other country. Hence, Japan is a nation so perfectly equipped from a technical and scientific point of view that her competition may well be feared by other nations. To make light of her industrial development shows a lack of appreciation of the remarkable progress she has made.—Brantford Exporter.

DEPRESSED BY ACUTE ACIDITY

There can surely be no doubt about the effectiveness of a remedy for acidity that can give such permanent relief as this woman's case.

"I suffered for many years from acidity in various forms," she writes. "At last it became so acute that every morning I woke with a gnawing pain and a great depression of spirits. I tried various remedies, but the effect was magical. The pain subsided and the depression lifted like a cloud. I have taken the daily dose of Kruschen ever since. That was about five years ago, and the Kruschen does not lose its effect."

(Miss) E. M. H. Kruschen is so effective with acidity because it neutralizes acid, takes all the ferment out of it, and gently expels it from the system. And by stimulating your organs of elimination it perfects regular action. Kruschen will prevent this harmful acid from even accumulating again. After that you'll experience no more misery after meals.

Canada's Metal Industry

Dominion Dominates World Status President Of Mining Institute

Within 20 years Canada's metal industry has grown by such leaps that it was possible to-day for the Dominion to produce practically all the copper, most of the lead and zinc and all of the nickel needed in the Empire. S. G. Blaylock, president of the Canadian Institute of mining and metallurgy, stated.

He was addressing a complimentary banquet given to him by the Grand Forks Board of Trade in connection with the convention of the Associated Boards of Trade of Eastern British Columbia.

Canada dominates the world in copper, nickel, lead and zinc, said Mr. Blaylock.

Mr. Blaylock thought there was little likelihood of the price of gold dropping for years to come. As a metal producer, the Consolidated Mining and Smelting Company of Trail, of which he is vice-president and general manager, was not concerned with the 10 per cent. tax on gold. Nickel, lead, copper and zinc producers would be only too glad to pay millions in taxes on these metals if the price was 75 per cent. over the normal price of 20 years, he stated.

Japan Buying Scrap Iron

Recent Cargo From Australia Contained Variety Of Articles

Japan has been picking up scrap iron all over the world, and one of the most varied cargoes of this kind arrived the other day from Australia. There were steel rails red with rust, old sewing machines, and automobile "fenders." On the top of one heap was a battered trombone. Scores of old drums ranged side by side with piles of worn-out machinery, car wheels, cooking stoves, and scores of other ancient and apparently useless articles, together with hundreds of thousands of old horseshoes. Even obsolete cannon were in the cargo.

A Good Definition

Crooning? Here is a college professor's illuminating definition of it: "An exaggerated and distorted expression of emotional feeling, a kind of semi-simulated noise that is emitted from the throat and attributed to some serious because it is something new. Only people of low intelligence like it." It was described thus by Dean John Patten Marshall of Boston University College of Music.

Wants Room For Expansion

Mussolini Expresses Need For Italy To Seek Room In Africa And Asia

Geographic and historic reasons were given by Mussolini in an interview with *Histor* Bywater, editor of the "Daily Telegraph" in Rome, for the expansion of Italian power in Africa and Asia, and the need for a strong navy.

During the interview, Mussolini said:

"Thirty provincial capitals are situated on the coast. Rome herself is near the sea. Geography is one of the immutable factors that determine the destinies of a nation."

Then he went on to say: "Geography and history both warrant us in taking Asia and Africa as objectives. We are nearer to those two continents than any of the greater western European powers. No one should mistake the meaning of our task. We are not thinking of any territorial conquest, but every-where those who are not aiming of a natural expansion allowing us to co-operate with the nations of Africa and the Far East."

Mussolini then turned to the problems of the League of Nations and of disarmament, saying:

"The principle of the reform of the League of Nations, which is almost universally accepted, is clear. The reforms that are being considered should only be undertaken after the closing of the disarmament conference, because if this conference fails, there will be no need to make any reforms. It will be enough to consider the work of the League of Nations as ended."

"It is generally considered that the conference will fail, at least as regards the most important objectives. The greatest armed powers will not discontinue those that are not armed will be in a position to arm with a more or less defensive purpose."

Paris Hotels Face Ruin

Times Heavy And American Tourist Business Falling Off

Instead of opening the customary new extensions as the tourist season starts, one leading Paris hotel, the Plaza-Athene, already has closed its doors, and numerous others are on the verge of doing likewise.

Hotel managers blamed two factors for their plight. First, that an average of one-third of all money taken in must be sent to the state in the form of taxes. Secondly, that the American tourist business has almost evaporated.

"If this continues for a short time more we'll have to close up, too," the director of a leading hotel in the Etoile district declared.

Here are a few of the hotel taxes: Six per cent. of every penny collected as a luxury tax. Four per cent. of all room bills as a city tax.

A social insurance tax. A tax for apprentices. A tax for mutilated soldiers. A tax for operation. A property tax. This totals from 25 to 50 per cent. of receipts.

New School Readers

Uniform Standard To Be Adopted By Four Western Provinces

A new standard of school readers has been adopted by representatives of the four western provinces to be used in the public schools. These representatives have been meeting from time to time for the past two years judging the contents of the books. The seven books in the new series are to be known as "Highroads to Reading." The books will be adopted as school readers for the fall term of 1935. All will be uniform in style and will be admirably bound and will have colored illustrations. The printing will be done in Toronto.

The fox-tail lily is a striking looking plant for the back of a large border. It is also known as "the desert candlestick" on account of its long strap-shaped leaves and tall spikes of flowers like a column or a candle.

"Blue" Spells

Radio Signals For Aviators

Ingenuous Device Will Keep Fliers In Defined Lines

A device for visually interpreting signals of aeronautical radio range beacons has been developed by W. E. Jackson and L. M. Harding, radio engineers of the U.S. commerce department's aeronautics branch, according to Rex Martin, assistant director of aeronautics.

Signals, Martin explained, are received through headphones by aviators who rely upon them for guidance during periods of poor visibility.

The device features an indicator which, fitted in the instrument panel, is similar to the contrivance used for blind landings. It is open-faced and has two needles—one vertical and one horizontal. The vertical needle, Martin explained, is chief indicator when an airplane leaves the course defined by a radio beacon, this needle will move accordingly. However, he added, if the airplane is exactly on course, the vertical pointer will remain in centre of the dial.

The horizontal indicator, the official revealed, shows the volume of received signals, which the pilots may adjust as he sees fit.

Egg Trade Responsibility

Responsibility As To Eggs Below Grade Placed On Seller

In case of dispute about properly marked cases of graded eggs, the Canadian egg regulations are quite explicit. No case or container of eggs is considered to be properly marked if, upon examination by an inspector, the case is found to contain more than an average of 4 1/2 per cent. below grade, apart from breakage. In transactions between wholesalers, or between a wholesaler and a retailer, any complaints by the purchaser with respect to eggs below grade must be made to the seller within 36 hours of the receipt of the eggs. Thus, responsibility as to eggs below grade is upon the seller for the period of 36 hours after delivery to the buyer. After the expiration of the 36 hours the responsibility as to eggs below grade is upon the person in whose possession such eggs are found.

For Civil Servants

Want Temporary Employees Brought Under Civil Service Act

Representations on behalf of various classes of civil servants were made by V. C. Phelan, president of the Civil Service Federation of Canada, before the common civil service committee.

Mr. Phelan asked that 316 long temporary employees in various government departments who had been eligible for permanent appointment prior to 1927, but through negligence or some other cause were not appointed, now be brought under the Civil Service Act.

Public School Education

Public school education in Canada costs \$63.63 per year per pupil, according to reports published by the Canadian government. The report shows the total expenditure is about \$165,000,000 a year. In 1932 there were 86,216 teachers, 2,593,116 pupils in the Canadian school system.

Increased Payrolls

Movement In British Columbia To Improve Working Conditions

Payrolls in British Columbia have been increased by approximately \$200,000 per month since the provincial department of labor started its drive through the board of industrial relations and other agencies to improve working conditions within the provinces. Hon. George S. Pearson, minister of labor, has estimated.

In the sawmill industry alone, the advance was about \$85,000 a month, he said. The aim of the board so far, Mr. Pearson said, had been to set minimum wage scales as high as could be paid by the industries affected, but not so high they would be forced to stop operations. As conditions improved within a particular occupation, the level could be raised if necessary.

Trying To Find Secret

Manufacturers Seek Buddhist Method Of Producing Stainless Steel

To study four columns which have stood for 2,000 years without showing a sign of decay or rust, a body of European steel manufacturers are visiting India. They hope to learn how people of those days produced stainless steel. The columns were erected by Asoka, the great Buddhist emperor, in four districts of his Indian Empire. Each stands on a high rock and is inscribed with the laws of Asoka's reign. Through the centuries earthquakes have not shaken them and storms have not rusted them. The secret of their making is believed to rest with descendants of the makers, and the steel manufacturers hope to learn this.

Soybeans Profitable

The Farmers' Advocate says many livestock men, and dairymen particularly, are finding soybeans a profitable crop to grow. The benefit of the protein content of the meal mixture and for hay they are both productive and palatable.

CHILDREN'S CONSTIPATION Ended!

Mrs. H. T. Brownson, Athens, Ont., writes, "My baby boy was troubled with constipation. I gave him Baby's Own Tablets as directed. Before I had given half the box the constipation was righted. The children's ailments of Baby's Own Tablets prevent more serious ailments developing. Much easier to take than nauseating laxatives and perfectly safe for all little folk from the wee babe to children of school age. 25c packages."

Advertising Restrictions On Radio Programs Will Be Considered

Ottawa.—Restrictions presently existing on the advertising content of radio programs will be considered by the parliamentary radio committee before compiling its report for presentation to the House of Commons. Strong representations have been made, notably by the Canadian Newspaper Radio Association, asking the committee to recommend a loosening of regulations governing the amount of advertising matter allowed in broadcast programs.

The association finds the advertising regulations are "definitely dangerous to the existence of privately owned stations, and are therefore inconsistent with the principles of democratic government." While those responsible for making the regulations had in view the welfare of the radio audience they overlooked the fact that audience is the "most selective in the world," says a brief filed with the committee. The association holds the radio audience is "thoroughly well able to take care of itself."

The association regards it as illogical and impractical to impose any limit upon advertising content inasmuch as conditions vary too widely in Canada. Canadian stations, more or less blanketed by United States programs at given periods, must overtake their revenue during off periods when no United States programs are being heard. The radio commission regulations, due to the restrictions imposed on advertising matter, forbid that practice, however.

The general result is the privately owned stations can not afford to give the public good programs, which militates against the employment of good artists and announcers.

"After all," the association says, "it is the advertiser that pays for all the entertainment put on the air by a private station—and to encourage advertising can only result in poor programs, poor entertainment and a dissatisfied public."

The brief was filed by P. H. Morris, secretary of the association, whose officers and executives are: Charles Thomas, London, president; Howard P. Robinson, Saint John, vice-president; Frank J. Bud, Vancouver; O. L. Spencer, Calgary; Victor Sifton, Regina; A. W. Robb, Halifax; J. D. MacKenzie, Saint John; T. F. Drummond, Saint John; and M. Bell, Calgary, executive.

Awarded Gold Medal

Miss Jessie Gray of Toronto Wins Honors In Medical Graduating Class

Toronto.—Miss Jessie Gray, of Toronto, was awarded the gold medal in the graduating medical class of the University of Toronto, the university announced.

Second place in the medical graduating class went to T. Kikayama, Japanese student, from Cumberland, B.C., and third honors went to R. C. Dickson, of Ottawa.

Byrd Reports Severe Cold

Little America, Antarctica.—A temperature of 72 degrees below zero was reported May 21 by Rear-Admiral Richard E. Byrd in his isolated outpost on the Ross ice barrier. Since the coldest part of the Antarctic winter is still to come, this temperature indicated Admiral Byrd's prediction that his base may be the coldest spot ever inhabited will be fulfilled.

Canada's External Trade Shows Rapid Advances According To Summary

Montreal.—Canada's external trade is shooting upward. The Bank of Montreal business summary for April draws attention to an increase in exports over April, 1933, of \$14,358,000 or 70 per cent, and an increase in domestic imports of \$11,571,000 or 57.5 per cent.

"These are remarkable figures," the summary declares. "They reveal the largest volume of commerce in April since 1931, attributable in the case of exports largely to the empire preferential tariff agreements and in the case of imports to the rising tide of activity within Canada."

Drouth In Russia

Mobilization Of Fire Departments Ordered To Water Parched Crops

Rostov, U.S.S.R.—With a mobilization akin to a military movement, Communist party chiefs started a farthing war on drouth which menaces the Russian wheat fields. In the Azov-Black Sea region the party chief of the regional agricultural department, carrying out instructions from Moscow ordered mobilization of all city and village fire departments and started concentrating all available barrels at strategic points in the fields.

All able bodied men who can be spared from other tasks are ordered to help bring water to the parched crops.

Both winter and summer crops, the party chief said, "are in sad condition and getting yellow because of lack of moisture." Sprinkling from streams will be undertaken.

Meanwhile, light to heavy rains were reported to have fallen in southwestern Ukraine and part of the lower Volga region, two large regions of Soviet Russia's chief grain-growing section.

Battle In Bolivia

Reported That 6,000 Paraguayans Have Been Slain

La Paz, Bolivia.—Army despatches from the battlefield stated that more than 6,000 Paraguayans have been slain and at least 12,000 wounded by a strategic Bolivian counter-attack before Fort Ballivan.

The action was regarded here as a master stroke by Col. Bernardino Bilbao Rioja, in command of the Bolivian forces in the "Canada" and "Strongest" sectors.

The 8th, 7th and 2nd Paraguayan divisions occupied respectively the left, centre and right wings, fronted by the 2nd Bolivian division.

The 2nd Bolivian division was deployed strategically for the strongest possible defence of the sectors, and at the same time it asked for immediate reinforcements from garrisoned positions.

As these reinforcements arrived they were distributed effectively in a circling movement, mathematically designed to surround the three Paraguayan divisions.

Lowers Record

Miss Joan Batten Establishes New Record For Women In Flight From England To Australia

Darwin, Australia.—Miss Joan Batten, New Zealand aviatrix, set a new women's record for an England-to-Australia flight when she set down her plane here. She lowered the 19-day record, established by Mrs. Amy Molison in 1930, by 4½ days.

Mrs. Molison required 19 days to cover the route that since has been flown in seven days by male aviators. Miss Batten kept well ahead of the record all the way from London.

No Insurance Plans

Ottawa.—While believing some form of contributory unemployment insurance is inevitable, Prime Minister R. B. Bennett was unable to inform the House of Commons if any legislative action would be taken at the present session.

Would Regulate Trade

Proposal Made Before Parliamentary Price Spread Probe

Ottawa.—Wiping out of the Combines Investigation Act to be replaced by legislation giving the Dominion government power to regulate trade and commerce, was proposed before the parliamentary price spreads probe. The suggestion was made by C. H. Canale, president of the Goodyear Tire and Rubber Company.

The principal object of the Combines Act was to safeguard the public against unwarranted or unfair prices. This safeguard, to which the public was entitled, should be brought about in a more constructive way, the rubber company held. Companies should not be prevented from organizing so as to become highly efficient.

Many phases of trade and commerce might be regulated as well as high prices, Mr. Canale told the inquiry. Low prices were as destructive as high prices.

The government owed it to industry to give it adequate supervision. His proposal would develop healthy business and be a proper safeguard for the public.

Fatal Strike Riot

Two Men Killed By Troopers At Toledo, Ohio

Toledo, Ohio.—Two men were shot and three others injured as a crowd of more than 6,000, hurling bricks and bottles, returned to battle national guardsmen who killed two men in a strike riot a few hours earlier at the electric auto-lite plant here.

Cursing and taunting and throwing missiles, the crowd closed in on 25 militiamen at the edge of the six blocks strike zone. The guardsmen hurled gas bombs and the angry crowd fell back, only to push forward again. The soldiers fired a volley over the heads of the throng, which included many women. The response was more bricks and bottles.

Aiming their rifles at the rioters, the troops fired a short volley and the crowd broke, leaving the wounded on the streets. The crowd surged back several times but at 10 p.m. a heavy gas attack had driven them back two blocks.

At midnight comparative quiet reigned.

Edmonton Air Crash

Giant Fokker Monoplane Burned At City Air Port

Edmonton.—Fred Hodgins, aero mechanic, was fatally injured, and Pilot Matt Berry and Airport Manager Capt. James Bell critically hurt when a giant Fokker monoplane crashed and burned at the city airport. Hundreds of holiday seekers saw the crash, which came at the end of the annual Air Club air show. The machine was taking off from the airport, officials said, and had reached a height of 30 feet when it suddenly "settled" down again, struck on the left wing tip, and crashed into a heap of wreckage. It burst into flames immediately, and the three men in the machine were hauled out by witnesses.

Hodgins died as he was being taken into hospital. He suffered severe burns and other injuries, as yet not ascertained.

Naphtha Prices Reduced

Calgary.—A reduction of 32 cents a barrel on naphtha purchased by local refineries from Turner Valley producers was announced recently. The new scale sets a price of \$2.55 a barrel for clear naphtha, and \$2.19 on crude oil, 50 gravity and up. A continued surplus of Turner Valley naphtha is given as the reason for the reduction.

CRITICIZES FACT

Malcolm MacDonald, son of the British Prime Minister, and Under Secretary for the Dominions, told the House of Commons he would not say the United Kingdom was entirely satisfied with what Canada and Australia had done in the way of implementing their Ottawa Economic agreements.

Balanced Railway Budget

President Beatty Of The C.P.R. Favors Unified Railway System

Montreal.—A balanced railway budget within a reasonable period of time was promised by E. W. Beatty, K.C., president of the Canadian Pacific Railway, if his scheme of a unified and privately administered system were adopted by the railroads of Canada. He made his promise in the course of an address to the Canadian Political Science Association, holding its annual meeting here. He said the unified system would be able to finance justifiably extensions which expanding settlement and development might in future demand.

Mr. Beatty's subject was "The Canadian Transportation Problem," and he dealt with the present situation created by the Canadian National Railways debt after outlining the physical and political events leading up to it. He styled the history of Canadian government railway since 1900 as a "veritable hodge-podge."

Mr. Beatty announced that displacement of labor would be overcome through the normal turnover.

Dominion Loan Arranged

Three Prairie Provinces Are Assisted By Federal Treasury

Ottawa.—Orders-in-council passed under the Relief Act disclose that a further loan of \$600,000 on provincial treasury bills at five per cent maturing May 28, 1935, will be made by the federal treasury to enable Manitoba to consolidate two similar loans maturing in May and June of this year. The maturing loans are of \$500,000 expiring May 28, and \$100,000 expiring June 15.

A loan of \$294,000 has also been authorized to assist the Manitoba government in meeting its share of relief costs during May and June of this year.

Saskatchewan and Alberta will be assisted by the federal treasury with loans up to \$750,000 each to enable them to proceed with road building operations this year, according to orders-in-council passed under the Relief Act. The amounts will be advanced as the work proceeds and will be secured by provincial treasury bills at five per cent. interest.

Eligible For Medal

Ottawa.—More than 300 members of the Royal Canadian Mounted Police are reported eligible for a long service medal authorized for issue through a royal warrant from the king.

United Drive On Grasshopper Pest To Save Western Crops

Ottawa.—A united drive on the grasshopper pest by United States federal officials and prairie farmers and provincial and Dominion governments in Canada now under way, is expected to almost completely save this year's crops in southern Saskatchewan and Manitoba.

"On a normal crop of 15 bushels to the acre we expect to save 14 bushels," Hon. Robert Weir, minister of agriculture, told the House of Commons.

Grasshoppers entered the debate when the agricultural estimates were under consideration. Hon. W. Motherwell, former minister of agriculture, referring to a recent announcement of a large grant to the province of Saskatchewan to assist in fighting grasshoppers, declared the action had been taken because of his complaint last week that the federal government was doing nothing to assist in this work. At the same time he had told the house that the United States government was spending \$2,000,000 in the grasshopper campaign.

"You can't tell me this is a coincidence that this government is now going to spend the same amount," exclaimed the 75-year-old ex-minister. When Prime Minister R. B. Bennett explained that the money recently voted for Saskatchewan to fight grasshoppers was to assist that province in paying for work already done, Mr. Motherwell declared he was "stirring the house."

Sweepstake Winnings

Should Be Forfeited To Crown And Not The Informant

Ottawa.—Two changes in the law governing lotteries were suggested in the sweepstakes debate by Hon. Hugh Guthrie, minister of justice. The debate centered in the bill to legalize sweepstakes being killed.

Under the existing clause in the criminal code when a man wins a lottery prize, it is forfeited to any informer who may succeed against him in court. This was not a suitable provision, Mr. Guthrie thought. The winnings should be forfeited to the crown, not to the informant.

The fine for purchasing a lottery ticket was \$20. This might very well be raised to a larger amount, the minister suggested.

Defenses For Saar Region

Paris.—Expenditure of \$9,000,000 to build fortifications along the Belgian frontier, only 50 miles back of the disputed Saar region, was recommended by the army committee of the chamber of deputies. This 15-mile string of defensive works would be part of the armament strengthening program calling for the outlay of 3,000,000,000 francs (about \$195,000,000) which is contemplated by the government.

Legislation For A New Marine Flag Designed By Senate

Ottawa.—Legislation for a new marine flag for Canada was designed by the banking and commerce committee of the senate. The new flag—

"That is a statement that must be withdrawn," Mr. Bennett hotly declared to the chamber.

"I have withdrawn," said Mr. Motherwell, but he proceeded to insist that it was difficult to believe the prime minister's explanation. He was suspicious of the manner in which the money had been advanced.

"What is this," Mr. Motherwell asked, "a grasshopper campaign or an election campaign?"

Mr. Weir explained the difficulty last year was that United States authorities had not directed any campaign against the grasshoppers in the areas adjacent to Saskatchewan and the grasshoppers had thrived there and descended on the Canadian side in clouds.

Realizing what had happened, the minister continued, the United States took effective steps to remedy the situation and an international conference was held in Fargo, North Dakota, last winter, with provincial government officials in attendance. It was agreed to work in concert against the pest and the United States federal government decided to spend \$2,000,000 if necessary on their side of the line.

It was believed the Canadian effort, which would cost about \$700,000, would be as effective as that of the United States. The officers of the Dominion entomological branch had met with the provincial government representatives and set up a central committee which launched an educational campaign in the affected areas.

British Columbia Reports

Improved Business

Early Promise Of Better Conditions Being Borne Out

Victoria.—The first quarter of 1934 has borne out early promise of a happier year for British Columbia. Bank clearings were up some 25 per cent. over the same period in 1933. Lumber production was up 90 per cent. to 487,336,000, f.b.m. Lumber exports by water were 291,139,097 f.b.m., about double that for the first four months of 1933.

Gold production at 61,833 ounces showed an increase of 22 per cent. Silver, lead, zinc and copper were reported improving though current figures are not available. Coal gained five per cent.

Agricultural products were up 10 per cent. in volume with prices firmer.

Payrolls are about \$10,000,000 monthly, up about \$200,000 per month, inferred from the fact the one per cent. tax is yielding \$100,000 monthly, and this excludes incomes below \$50 a month.

Decline in number of persons on relief was at about the rate of 12,000 per month for March and April compared with those months last year.

if approved by parliament as designed by the committee—will carry a maple leaf on the marine ensign instead of the shield of Canada, as at present carried.

The new measure is the first legislative step taken regarding the coast to coast controversy which has been waged on the question of a new national flag. Senator Raoul Dandurand, Montreal, Liberal leader in the senate, sponsored the new marine flag in an amendment to the shipping bill, which passed the committee by a vote of nine to five. The amendment was passed over the objections of Senator W. A. Griesbach, Edmonton, acting chairman, and Senator Arthur Meighen, Toronto, leader of the Conservative forces in the senate. Senators Griesbach and Meighen were of the opinion a new marine flag should await a decision on the national flag.

The amendment to the shipping bill as passed puts the question of a new marine flag up to the senate and the commons. The bill will be reported to the senate at its next sitting, and will go to the commons before the end of this week.

NOTES AND COMMENTS

"A THING of beauty is a joy forever," is a familiar quotation of which we are reminded when gazing on the improved town hall. It contrasts strongly with other buildings and emphasizes the necessity for town planning. Instead of a conglomerate mass of buildings, with houses built right up to the sidewalk or at varying distances from it, giving a higgledy-piggledy appearance, how much nicer it would be to have an orderly and well-kept building plan followed. With beautiful natural surroundings, towns in this area could be made attractive to the eye, and pleasure would be derived by those who dwell therein.

A FEW years ago efforts were made by the Board of Trade to have a planning system put into operation at Crows Nest Lake. Lack of co-operation by the council in office at that time caused the proposal to be neglected, with the result that a collection of frame buildings was erected which cannot be classed as attractive. Once a place is made ugly by lack of building planning or control, it is difficult to make a change, and eyesores instead of beauty spots mar the landscape.

A PAINT-UP Campaign is due in Coleman. Four years ago The Journal made a strong plea for this purpose, which resulted in a considerable amount of work being done. Those who sell paint might well engage in a co-operative campaign, for the power of suggestion has far-reaching influence. There are hundreds of thousands of yards of unpainted surfaces on Coleman buildings, the value of which would be enhanced by liberal coats of paint. Some parts of the town one hesitates to take a visitor to view.

ANOTHER evil often noticed is the indiscriminate dumping of rubbish. The town has a bylaw covering the disposal of refuse which is never enforced, with the result that many individuals dump refuse where it meets the eye of every passer-by and makes one feel at times that the town is just a "dump." It is time that effective police work was done to remedy this evil, and the officials responsible should be given the backing of the council to see that the practice is stopped. Now that we have a decent-looking town hall, proceed further and see that the lanes and vacant lots are kept cleaned up. If one policeman is not sufficient to see that bylaws are observed, then employ another. There are lots of men who would be glad of a job, and a community of nearly 3,000 people is worthy of a far better appearance than it now presents. Down at Blairmore they do better than Coleman in this respect, for property owners are threatened with \$5.00 fine or 60 days in the cooler with hard labor for failure to observe the clean-up by-law. Too much leniency begets appalling sloth. A little more law enforcement would be beneficial.

WORDS—mere words, is all that so-called Workers Unity League organizers have to offer. Is there a single example of Unity after three years or more of efforts by revolutionary organizers in Crows Nest Pass labor circles? Viewing the situation without prejudice, we see Blairmore split into factions, Bellevue to a lesser degree, Michel is the latest town where a division has been caused by irresponsible leaders, while in Coleman efforts to promote so-called "unity" have not been responded to, except for a brief stampede which was quickly halted by a sauer element among the workers.

WORDS—mere words, are dangerous. They can be used to lead people into hysterical and ill-considered actions, making them liable to criminal prosecution. Freedom of speech so flagrantly abused by meal-ticket organizers is a dangerous weapon which can easily provoke a riot, incite women to become savages and cause hatreds which settle nothing.

FORCE of public opinion is the only influence which will discredit individuals whose sole activity in labor circles has been to foment agitation.

WITH such men trying to lead, a district agreement which they seek is an impossibility. Operators will not recognize them, neither will a majority of the mine-workers. The outlawed union will have to go and a new structure organized with leaders in whom the mass of mine workers have faith. Men of principle, men who regard a contract as inviolable, are required as leaders of Crows Nest Pass workers.

LIFE is progressive. You cannot remain stationary. You must move forward in thought and action, or be superseded by those who are more aggressive. It is a natural law of life which cannot be ignored or side-stepped. Nothing remains permanent. Even the mountains change their conformation with the passing of time, and a human life is but a brief span. Make the most of it while you may in usefulness, for that is the way to true happiness.

IT is many years since such keen interest was taken in local sport activities. Getting back to real enjoyment and pride in home teams possibly is one result of changing conditions.

Coleman Won From Corbin 2-1 in League Series Victoria Day

Coleman continued their winning streak on Victoria Day when they defeated the highly touted Corbin team by a 2-1 score.

Corbin never looked like a winning team throughout the entire game. Their mid field play was ragged and their finish around goal was pitifully weak. Coleman on the other hand, though not outstanding, played a nice game and had always an edge on their opponents.

Coleman won the toss and played with advantage of the wind. During the first ten minutes, play was continually in the Corbin eighteen yard line and the Corbin goal had some close saves. Corbin finally broke away and made several raids on the Coleman goal, Jerwaski driving one which Ford saved magnificently. Exchanges were fairly even and play for the most part was in mid field. After thirty five minutes of play Joyce who had been working hard, scrambled his way through the Corbin defence and headed past Beswick for Coleman's first goal. Two minutes later Coleman let a glorious opportunity pass when a combination play by W. Anderson, Joyce and Brown brought the ball in front of the Corbin goal; but uncertainty seemed to exist between Joyce and Brown about shooting the ball, allowing a Corbin player to rush in and clear. The first half ended with Coleman one up.

The second half saw play more even and Coleman defence were given more work. The defence however were clearing nicely and giving Ford good protection. After twenty minutes of play Coleman forced a corner. Brown took the kick nicely for Jack Anderson to head the ball which hit the upright, going out to Fraser, who was lying uncovered, to tap it home. With Coleman two up Corbin started a heavy attack which resulted, after continued attacks on goal, in a penalty, when a Coleman player handled the ball. Lillie took the spot kick and in an effort to trick Ford missed the goal entirely. After missing the penalty Corbin seemed resigned to defeat and their play became more ragged than ever.

Some misunderstanding arose between the referee and his timekeepers during the dying moments of the game. When time was called the referee continued the game for over a minute and Corbin scored during this extra time when Joe Ball scored a beauty which had Ford beaten all the way. Final Result, Coleman 2, Corbin 1.

Line-up

Coleman- Ford, Griffiths, Burrell, Gardiner, J. Anderson, Park, W. Anderson, Fraser, Joyce, Jack Anderson, Brown.

Corbin- Beswick, Kolenaki, Lillie, Watson, Martin, Podgornick, De Luce, Fleming, Ball, Jerwaski, Barker.

Referee, Pete Sharp.

If you are on relief in Calgary you mustn't keep a cow, unless you take a proportionate reduction in milk allowances. This is the ruling of the civic relief agency.

Nipissing Mining Company had a profit of \$146,826 for the year 1933, compared with a loss of \$161,437 for the previous year. The profit shows includes interest from investments.

Premier R. B. Bennett has accepted the rectorship of Queen's University. He succeeds Dr. O. D. Skelton, under-secretary of state for external affairs, who held the office for six years.

Hon. George H. Sedgewick, chairman of the tariff board, has left for England where he will visit a number of manufacturing plants which are interested in applications pending before the tariff board.

Alan Cuthbert Burns, well-known in the British West Indies, has been appointed governor of British Honduras in succession to Sir Harold Kittermaster, recently appointed governor of Nyassaland.

Pleased with the success of the Mother's Day postage stamp depicting Whistler's Mother, U. S. Postmaster General Farley said he was ready to try a Santa Claus stamp to commemorate Christmas.

Dr. Louis Martin, one of the world's foremost authorities on contagious diseases, was named head of the Pasteur Institute. For 40 years Dr. Martin has been associated with the institute.

Creating a legal unit to which Manitoba can turn over the 1,500 acres donated from the Turtle Mountain reserve, the International Peace Gardens, incorporated, was granted a license to do business in the province.

Fires in Alberta in 1933 took toll of 30 lives compared with nine in 1932, according to the report of Fire Commissioner Henry Brace. There were 1,832 fires during the year with property loss of \$1,435,612 compared with loss of \$2,495,491 from 1,937 fires in 1932.

May Ship Via Panama Canal

Route Being Investigated By B.C. Livestock Interests

The proposal by British Columbia livestock interests that beef cattle might profitably be shipped to European or British markets is again being investigated. A proposal has been advanced that B.C. cattle could be shipped alive through the Panama Canal from Vancouver and the feasibility of this is under consideration.

Statistics reveal that the move would not be so much a means of finding an outlet for any excess production, since B.C. already imports more than half as much beef as it produces, but would merely serve as an avenue for hoarding the price, if it were feasible. Stockmen claim that Alberta beef depresses their prices to such an extent that the industry becomes unprofitable for the B.C. producers. By shipping to the British market according to the argument advanced, B.C. cattlemen could get a better price for their beef than they can on the home market, even with rates included.

Dr. W. R. Gunn, livestock commissioner, and J. A. Grant, marketing commissioner, have been discussing the matter with livestock men during their recent visit to Williams Lake.

Rich Radium Find

Biggest Pitchblende Strike Yet Uncovered In The North

Radium ore beds at Hottah lake, 100 miles south of Cameron bay, N.W.T., are even richer than first reports of prospecting parties stated, Edward Hartraves, Toronto mining man and managing-director of Great Bear development, revealed recently.

"It is the biggest pitchblende strike ever to be found in this country or the United States," he continued. He displayed a sack of sample ore. He declared that in his company's field they have a ton of ore sacked and ready for shipment. It was taken out only with sledge hammers.

He declared that the ore is worth \$6,000 or \$7,000 a ton, and will be shipped to an eastern refinery. He declared that the silver is not showing yet in the new area, as at Great Bear lake.

Children and flowers thrive best with plenty of sun and air.

Canada expends \$135,000,000 annually to keep her schools going.

Agricultural Notes

Many Items Of Interest To The Western Farmer

The first asparagus shipments this year from the Niagara district of Canada were made on May 7.

The largest crop of tree fruits in history is expected this year in the Okanagan Valley, B.C.

The first British Columbia strawberries on sale this year at Calgary, Alberta, on May 2 were exactly one month earlier than last year.

Canadian cattle sailings to Great Britain this year up to May 10 totalled 15,964 head, as against 13,246 for the same period of last year.

For the first 19 weeks of this year, up to May 10, 1,224,582 hogs were graded in Canada, as against 1,220,768 for the same period of last year, an increase of 3,816.

Timothy is grown in England as a permanent mixture but it is not saved to any extent as a seed crop. The United States generally supplies the greatest proportion of this seed.

Canadian asparagus is regarded in Britain as the best available, and, since the United Kingdom harvests very little of this seed as a crop, the bulk of the requirements are drawn from Canada.

Toronto lambs made the high mark of the year under a moderate run for the week ending May 10, when Western food-lot lambs topped \$9.50 per cwt. Spring lambs had a top of \$9.—Livestock Market Report, Dominion Department of Agriculture.

The reports of crop correspondents throughout Canada at the end of April indicated that prospects for the 1934 crops were below average, the most unfavorable conditions being reported from Ontario, Manitoba, and Saskatchewan.

Twenty-one large boxes of British-grown chrysanthemums were carried to Montreal in the C.P. liner Duchess of Athol, and forwarded by rail to British Columbia. The plants were rooted and grown in specially prepared soil, and were landed every day during the entire journey by sea and land.

Winter-killing of fall wheat in Ontario was particularly severe, the per centage (39) being the highest of any year on record except the disastrous winter 1917-18, when it was 56. Of the 651,000 acres of fall wheat seeded in Ontario last autumn, it is estimated that 244,000 (or 39 per cent) acres are winter-killed.

The contemplated reduction in spring wheat acreage in Canada this year is divided among the three Prairie Provinces—101,000 acres in Manitoba (4 per cent); 1,622,000 acres in Saskatchewan (per cent); and 305,000 acres in Alberta (5 per cent). The other provinces, where spring wheat is almost negligible, show little change.

There is a smaller carryover of hay this spring than there has been for many years, owing to the strong demand caused by the past long severe winter. It follows, says the Dominion Seed Branch report for April on hay marketing, that the market hay crop for 1934 will need to be larger than usual so as to meet the requirements of next winter.

Winter injury to fall rye in Canada was most severe in Ontario and Saskatchewan. In Ontario, 16,300 or 29 per cent, of the 56,300 acres sown to fall rye were winter-killed, leaving 40,000 acres for harvest.

In Saskatchewan 38,000 or 16 per cent, of the 240,000 acres sown, were winter-killed, leaving 202,000 acres to be harvested. For all Canada, 422,100 acres were sown to fall rye, and 15 per cent, or 61,900 acres, is estimated as winter-killed.

Glass "Windows" For Engine

Motorists Can See As Well As Hear Knock

Nearly every motorist has at one time or another heard "knocks" in his engine; now these disturbing noises may be seen.

Engineers at Massachusetts Institute of Technology have placed glass windows in an automobile engine and visitors to the 11th annual open house at the Cambridge institution on May 5 saw as well as heard those harsh sounds denoting internal trouble in gasoline engines.

A Women's Who's Who

With an array of over 6,000 names of English women, Hutchinson & Co., the London publishers, will soon launch a "Women's Who's Who". The list has taken two years to prepare and contains the names of 150 women air pilots, 3,500 women doctors, 300 women justices of the peace, 900 women county councillors, 84 women architects, and dozens of solicitors, estate managers, housing pioneers and members of parliament.

Little Journeys In Science

MOLECULES
(By Gordon H. Guest, M.A.)

Scientists believe that all matter is composed of very small particles called molecules. These molecules are invisible and cannot be observed even with the aid of the most powerful microscope. It has been calculated that it would require about forty million molecules, touching one another, to make a row one inch long. Again, it has been computed that a small thimbleful of air contains about twenty-seven billion billion molecules. There are spaces between the molecules which are supposed to be much larger than the molecules themselves. These spaces between the molecules are known as the inter-molecular spaces.

Molecules are constantly in motion and they are also elastic. The hydrogen molecule, for example, has an average speed of over a mile a second and bumps against its neighbors about ten billion times per second under ordinary conditions.

In the case of gases the molecules are quite separate and distant and have great freedom of movement. The particles of a gas appear to be perfectly elastic and as a result their motion is slowed up when they collide with one another or when they bombard the sides of the enclosing vessel. The pressure of a gas upon the vessel is due to the constant motion of molecules upon its walls. A definite quantity of a gas left in an open vessel is capable of indefinite expansion. Gases are therefore very compressible. A good illustration of this fact is that when a quart of water is evaporated it yields about seventeen hundred quarts of steam, measured under the normal pressure of the air and at the boiling point of water. This shows us why a strong vessel is required to hold steam at high pressure.

A liquid is more compact than a gas; that is, its molecules are closer to one another, and therefore have less freedom of movement. When a liquid evaporates some of the molecules escape into the air. The speed of a molecule depends upon its temperature and hence the warmer molecules of a liquid are lost first. This migration of the warmer molecules from a liquid results in a fall in temperature when a liquid evaporates. It is well known that water is cooled in certain countries by placing it in porous vessels in order to promote evaporation.

Solids, like liquids, are much more compact than gases. The molecules of solids are much more restricted in their movements, and appear to vibrate or rotate about fixed centres of rest.

Electricity Helps Farmers

Greater Use In Scotland Is Making Life Easier

Farmers of Scotland are using electricity to speed growth and make life easier. Nearly 400 are employing it for milking and in butter making. Market gardeners have recently found that they can accelerate the growth of vegetables by starting them in a hot-bed warmed by electricity. The "magical current" is just being introduced into hen houses, lights early in the evening and morning, deluding the biddies into believing the day is longer and thus causing them to lay more eggs. Ultra-violet rays produced from a lamp is being used extensively in the rearing of chicks.

Legacy, a new, promising variety of oats, produced by the Cereals Division, Dominion Department of Agriculture, from a cross between Banner and Eighty Day has done particularly well in Northern Saskatchewan, Central and Northern Alberta, and in the Eastern Townships of Quebec.

Hamelin To Celebrate

Will Commemorate 680th Anniversary Of Pied Piper's Visit

All living "children and children's children" of the ancient town of Hamelin, Germany, received invitations to return for a grand homecoming which started May 20 and running for the summer to commemorate the 680th anniversary of the strange Pied Piper of Hamelin. They will retell the tale and fate that befell all of Hamelin's youngsters when they were led off by a spiteful musician "clad in a garb of bright colors" and were swallowed up by the earth to the tune of his weird pipings. Only a little cripple who, according to legend, couldn't keep up with the merry crowd, lived to tell the tale, which Robert Browning put in English verse.

It was on June 26, 1284, the story goes, that a piper cast a fatal spell over the children, all because the town fathers bickered and refused to pay him his just due for riding the town of a plague of rats.

The legend is traced back by some authorities to the children's crusade of 1211, by others to a wholesale abduction.

Recipes For This Week

(By Betty Barclay)

BRAN BRITTLE

2 cups granulated sugar
1 cup brown sugar
½ cup light corn syrup
1 cup water
¼ cup butter
¼ teaspoon salt
1½ cups bran

Put the sugars, corn syrup and water into a saucepan and cook, stirring until sugar is dissolved. Continue cooking, without stirring, until 300 degrees F. is reached. (Cold water test, very brittle).

Remove from fire, add butter and salt and stir only enough to mix well. Add bran and turn at once on a greased slab or pan. Smooth out with a spatula. After about a half minute take hold of the edges of the slab, pull it as thin as possible. Break into irregular pieces. Provides 1½ pounds.

SALAD AMBROSIA

(Serves 6)

2 cups orange pieces
1 cup halved strawberries (or diced pineapple)
1 cup diced peaches
Lettuce
¼ cup mayonnaise
1 egg white
2 tablespoons sugar
½ cup shredded coconut
Powdered sugar

Combine fruit and arrange on lettuce-covered salad plates. Serve with yellow and white dressing of mayonnaise into which meringue of stiffly beaten egg white and 2 tablespoons sugar has been folded. Spread dressing over salad and sprinkle lightly with coconut and powdered sugar. Serve at once.

Ninety-five patches were required to repair damage inflicted to wings of an aeroplane caught in a hail storm in South Dakota.

Cotton production in Egypt this year is expected to be double that of 1933.

Hot cranberry sauce is good on waffles.

SUNDAY SCHOOL LESSON

JUNE 3

JESUS IN THE SHADOW OF THE CROSS

Golden Text: "He went forward a little, and fell on his face, and prayed, saying, My Father, if it be possible, let this cup pass away from me; nevertheless, not as I will, but as thou wilt." Matthew 26:39.

Lesson: Matthew 26:1-75.

Devotional Reading: Psalm 42:1-5.

Explanations And Comments

Boastful Self-Confidence, verses 31-35. "It was the night before the end. The little company were met secretly in an atmosphere charged with emotion. Either they did not know or they did not realize what the crisis would mean. They only knew that the purpose for which they had come to the city was near its accomplishment. The secrecy of their meeting place; the solemn and mysterious accents of their Lord; the departure of Judas fading into the night; the gracious words of comfort, spoken to his friends by their master—all these things had moved their hearts deeply. They were like men at a mas ball on the eve of action. It was the airless silence before the storm breaks. In such a mood of excitement they then listened to the chilling words spoken by Jesus" (Edwards).

Edwards, the Shepherd of the flock, was to be put to death that very night, and they, the sheep, were to be scattered, for they would all be offended in him, that is, caused to stumble by what was to befall him, as it was written (Zech. 13:7). Then he added the encouraging words: "After I am raised up, I will go before you into Galilee."

"If all shall be offended in thee," vehemently Peter exclaimed, "I will never be offended." He is not sure of the other disciples, but he is certain in regard to himself! How little he knew of his own weakness! Even after Jesus warned Peter that "this very night, before the cock crows, thou shalt deny me three," Peter reiterated his statement, and this time more forcibly: "Even if I shall die with thee, yet I will not deny thee."

In Gethsemane, verses 36-46. Jesus led the disciples to the Garden of Gethsemane, retreating for the last time his repeated journey thither for seasons of prayer and meditation. "Sit ye here," he said to his disciples, "while I go yonder and pray." Jesus began to be sorrowful and sore troubled, and even said to his disciples, "My soul is exceedingly sorrowful, even unto death." Before this he had talked calmly with them of the cup he was about to drink, but now, in truth, he was "clean forespent, forepent."

OCCASIONAL WIFE

By
EDNA ROBB WEBSTER
Author of "Joretta," "Lipstick Girl" Etc.

SYNOPSIS

Camilla, Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of landing an agency job. Others in the story are Avis Werth, another wealthy girl who is trying to win a scholarship, Sylvia Todd, Peter's model and Gus Matson, his former room-mate with whom he has quarrelled. After a party at an exclusive club, when the rest of the members of the party go to a cabaret to continue the party, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and the other two boys are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and they live apart. Camilla has gone from the studio, after a loan of \$1,000, Peter and Camilla are reconciled. Avis invites them to a party, at which she introduces Peter to well-known artists and public men.

(Now Go On With The Story)

CHAPTER XLV.

"You may as well wish Peter a bon voyage now," Avis advised Camilla with bright optimism. The three were in his studio viewing the finished product of his efforts.

"Wait a minute," Peter demanded. "I haven't entered the exhibit yet, even." But his own exuberant spirits betrayed his secret hope.

The bronzed figure, poised on its oval plinth, would be entered in the annual exhibit on the following day. Camilla's heart swelled with pride and she beamed at a wistful anxiety. Peter's sudden change of attitude toward his work, and his spirit of optimism during the past fortnight, both puzzled and delighted her.

Previously, he had wavered between contrasting moods of hope and despair, ambition and lassitude. Money had been his difficulty and the reason for his despondency. But he had maintained a cheerful attitude ever since that day of their first quarrel, which had concerned their finances. Perhaps the change over to it had transformed him permanently. Camilla thought. Yet she scarcely believed it, and wondered just what had happened. Perhaps the influence of the exhibit awards sustained him. If that was the explanation, she anticipated with dread the depth of his disappointment if he lost.

"And she is still a lady without a

Cookery Parchment
brings better, easier, cheaper cooking. Confines odors. Holds full flavor of meats, fish and vegetables. Inexpensive. Each sheet can be used over and over. All dealers, or write direct to

name," Peter observed. "The committee will have to decide the title here and now. Any new ideas floating around between you two girls?"

They looked at each other, each reluctant to speak. Finally, Avis asked sweetly, "What was that suggestion you made the other day, Camilla?" As if it had been of too little consequence to remember.

"I don't think I can offer anything better than 'Eager Youth,' But Peter must have thought of something better during these weeks while he has worked on it."

"Fact is, I hadn't thought much about it until Avis brought up the subject several weeks ago. I thought her idea was pretty good, and still do. 'Inspiration,'" he repeated thoughtfully. "She does look rather inspiring, at that," he grinned.

"Which of us—the figure or I?"

"Both of you," he bantered. "Oh, I have a marvelous idea." Avis declared suddenly. She was giving a party for Peter that evening to celebrate the completion of his work. All her plans, so far, had worked as smoothly and satisfactorily as well-oiled machinery, and her confidence was mounting rapidly. She was even venturing a little ahead of her plans, so sure was she of her victory.

"Why not have a christening and unveiling of the statue to begin the party tonight? Everyone will want to see it, so we'll all come in here for a nice little ceremony and then adjourn to celebrate with whoopee. I'll get a thin white cloth to drape over it and—oh, may I, Peter—be the mistress of ceremonies, make the statue and unveil it?" Her manner continued to grow more confident.

"Why not?" Peter inquired. "What else could he say? 'It's your idea. Go ahead with it.'"

"Then you will use my title?" he hesitated.

"It's all right. Any good sculpture is inspiring, and if it isn't that good, the name doesn't matter, anyway."

Avis fluttered across the room. "You're a dear to let me do this, Peter. Well, I'll have to run home to get tonight. I've several things to do for tonight. You carry the name on right away, so everything will be ready. I'll bring the veil over later."

Avis did everything energetically, by leaps and hunches, as if she were rushed for time doing important things; while she actually accomplished very little except the satisfaction of her own selfish desire.

"She's a pretty good scout," Peter observed indignantly, when she had gone. "What do you think, money—is the name all right?"

"Plenty!" he looked at her in surprise. "Didn't I consult you about the name, too?"

Camilla smiled bravely. "But you gave mine no consideration." "Money, I did. Fact is, I don't know much about it. I just want to use whatever is best, regardless of whose it is. So you don't like 'Inspiration'?"

"It means nothing. As you just said, it could be applied to any piece of sculpture. I don't say that 'Eager Youth' is the best possibility, but at least it applies to the statue and means something. A young girl standing on tip-toe and drinking eagerly from the fountain of life which she holds to her lips in the form of a futed shell. Doesn't that describe it, exactly? There is some imagination in it, anyway. I suppose hundreds of figures and groups have been named 'Inspiration.'"

"Yeah, maybe thousands," he conceded coolly. "Well, I don't, I can't offend her now. She's been mighty decent to me in a lot of ways."

Camilla held tightly to her words and emotions until she could escape. "Then, it's all settled," she said lightly, moving toward the door. "I'll have to run home and dress now for the party. See you later, dearest," and kissed him goodbye.

Alone she thought bitterly, how vain she had been. It took her to the heights of happiness only to dash her down mercilessly and fendishly to the bottomless pit of anguish. She just couldn't understand Peter these days.

CAN'T SLIP OR SLIDE FALSE TEETH

Don't use any old kind of remedy to keep false teeth in place—use a reliable, recommended one which dentists prescribe. Dr. Wernat's Powder—the largest seller in the world—stays teeth so secure yet comfortable they feel natural. Positively no slipping or sliding. Blistering comfort assured all day long. Forms a special cushion to protect and guard against chafing. Keeps your taste—keeps mouth sanitary—keeps pleasant. Inexpensive—all druggists.

superior to her own, she would have been glad to favor it. As it was—well, there was just a heavy weight of sadness in her heart as she prepared for the evening. She recalled with a little wary smile what Peter had said about Avis being mighty decent to him in a lot of ways.

How like a man! To give credit in full measure, pressed down and running over, to some woman whose attentions were an inexcusable sacrifice, and to dismiss lightly the sacrifices and generous considerations of the woman who loved him.

The thought suddenly mocked her that if Peter were so susceptible to feminine influences right here in the same city with her, what would happen to him for a whole year in Paris without her? But she dismissed that thought as instantly as it occurred to her. She did not doubt for a moment that Peter was loyal and true. His work abroad, if he had the chance to go, would absorb all his time and thought; and his life together after that would be a joyous eternity.

Her mind leaped ahead to plan for the days just before her. If Peter should go away, they would have to crowd all the happiness they could find together into the two intervening weeks. There would be a week of anxious suspense awaiting announcement of the prize winner. It would be a difficult time for Peter. She doubted if he could work at all—and he shouldn't. He needed a complete rest after these strenuous weeks of work and anxiety.

For the moment, she regretted her confinement to her own work, but resolved to give Peter every possible moment which she could spare from it. Perhaps she could persuade him to come to the apartment with her for a week, and Rose would generously go back to her mother's for the time.

Her own work was well established now, her copy up-to-date and planned ahead. It promised success, but only time would prove that. Already, her Tiny Tots were smiling up at her from the pages of numerous magazines, waving gleefully at her from signboards along the highway, peering down from store shelves where they cavorted on the boxes of cereal which they exploited—just as she had dreamed they would be doing when she had created them in that memorable night two months before.

She was proud of her achievement, whatever the outcome might be, but she kept to herself the fact that she was the originator of the Tiny Tots who had recently sprung up everywhere to claim attention. Only Peter shared her secret, and not even Rose knew how important the work was which his sister did for the advertising agency.

(To Be Continued)

New Aid For Aviators

After five years of research, Leo O. Delmaso, associate on physics at the University of California, has produced an acoustic altimeter that "hears" the earth and warns whether a ship of the air is approaching too rapidly toward a possible crash. The apparatus also informs the pilot the number of feet he is distant from landing disaster.

Tribute To King George

Empire Fortunate In Having Wise Monarch For Sovereign

It is 24 years since King George ascended the throne of his illustrious ancestors, and thus Their Majesties are entering upon their silver jubilee year. It is to be marked, at its end, by Empire-wide ceremonies in keeping with so important an anniversary in our widespread affairs.

For many reasons the people of the Empire will rejoice with their King and Queen in this anniversary year. There is much reason for congratulation in the fact that in the extraordinary events since 1910 the Sovereign has proved so wise, so adaptable, so much opposed to sham and pretence, so thoroughly a man of the people. When we consider for a moment the catastrophes which have been inevitable, the miseries of millions, if the King in these decades had been another sort of King, we realize something of what the Empire has been saved by the shrewd, simple, kindly, dignified family at Buckingham Palace—Ottawa Journal.

Summer Styles For Engines

Canadian National Has Put New Models Into Service

Some of the latest models in summer styles for locomotives recently steamed out of the motive power shops of the Canadian National Railway.

To the practical eye of an admirer of mechanical beauty they were the "last word" in up-to-date equipment. Among the latest wrinkles which they carry are feed-water heaters, by which water is pre-heated before being fed into the boilers; track aspirators to lay the dust ahead of passenger cars; and smoke deflectors to keep smoke from blowing backward into the eyes of the crews and passengers. The work has been underway during the winter months in the various motive power shops of the national system and, in all, more than 200 locomotives have been equipped with these, and other, modern appliances. All have been put in active service, in readiness for the tourist season to commence.

THE RHYMING OPTIMIST

By Aline Michaelis

A MOTHER

How can a mother ever find Through toil-filled days, through hours of stress, So many ways of being kind, So many moods of tenderness?

Life, sometimes, is a lonely thing, Bare of beauty and drained of dreams;

How can a mother always bring Shining hope back and faith's white gleams?

Wild regrets like grim ghosts will rise, Threatening all of the years ahead; Who but a mother can check vain sighs

And show how futile are tears we shed? Failure and folly may trouble each breast;

How can a mother's clear eyes see All of the virtues it once possessed Bloom in the heart, as it used to be?

Sounds Almost Impossible

Professor Auguste Piccard Foresees Fast Stratosphere "Plane Trips"

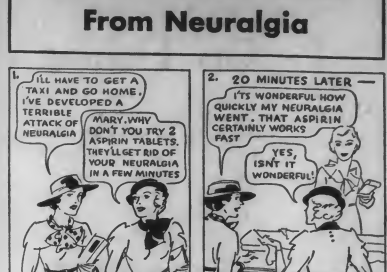

Nancy, France, June 19. Auguste Piccard declares stratosphere plane trips between Paris and New York in eight hours are almost at hand. With a tightly closed cabin and an air compressor for the motor, the trip will be made in fogless, stormless atmosphere 20 miles up.

This original stratospherian is already speculating on interplanetary trips. Perhaps a man-carrying rocket can be propelled by disintegration of matter. A round trip to Mercury might require disintegration of 10 millions of pounds of lead. Sounds fanciful, but Professor Piccard is taking the first practical steps—he's thinking it—Christian Science Monitor.

Use Of Wood For Heating Purposes
In spite of the preference for coal and other fuels for heating purposes, a large amount of wood is still so used. The quantity used in normal years is estimated by the Forest Service, Department of the Interior, at 913 million cubic feet, or 9,611,223 cords. Fuel-wood formed about 30 per cent of the total amount of wood cut in the Dominion for all purposes. During the past two or three years there has been a large increase in the amount of wood used for fuel.

Each day the kingfisher eats seven times its own weight.

Almost Instant Relief From Neuralgia

For Quick Relief Say ASPIRIN When You Buy

Now comes amazingly quick relief from headaches, rheumatism, neuritis, neuralgia, etc. The fastest safe relief, it is said, yet discovered.

These results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of seconds after touching moisture. And, instead of starting "taking hold" of pain a few minutes after taking, it tells the story. An Aspirin Tablet starts to disintegrate almost instantly, by you swallow it. And this is ready to go to work almost instantly.

When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN's quick relief, be sure the name Bayer is in the form of a cross is on every tablet of Aspirin.

WHY ASPIRIN WORKS SO FAST

Drop an Aspirin Tablet in a glass of water. Note that BEFORE it touches bottom, it has started to disintegrate. What it does in this glass it does in your stomach. Hence its fast action.

A Super-Highway

U.S. Government Receives Plans For Coast To Coast Route

An engineer's idea of the "super-highway" of the future was discussed by the Pittsburg chamber of commerce as it submitted plans with the federal public works administration for such a transcontinental route. Advocates estimate the approximate cost of the 3,000-mile roadway between \$300,000,000 and \$400,000,000, which would be borne by the government. Tolls and other mileage charges would make the project self-liquidating and self-sustaining.

Congested cities in its cross-country stretch would be eliminated as the proposed high-speed, non-stop thoroughfare would have no intersecting lanes, but ingress and egress by ramps only, and would be 90 feet wide with different lanes for varied speeds.

States traversed under the preliminary plan would be New York, New Jersey, Pennsylvania, Ohio, Indiana, Illinois, Missouri, or Nebraska, Colorado or Wyoming, Utah, Nevada and California.

In the resolution favoring the project, chamber directors stated it would provide a needed main artery for transcontinental traffic and rural employment.

Battle With Lion

French Soldier Is Badly Mauled For His Heroism

A soldier who tried to play Samson with a runaway circus lion was badly scratched and mauled for his heroism. The lion, bored with life in a menagerie on the outskirts of Paris, pulled up the planks in the bottom of his cage and headed for the bright lights.

The soldier cornered the lion in an angle in a fortification. The lion took a swipe at him. He kicked the lion.

Thereupon, the king of beasts bit the soldier, the shoulder and clawed him about the head. Then the lion's trainer arrived and got the fugitive into a portable cage.

Most British City

With 80.1 per cent of the total population of British origin, Moose Jaw has the claim to the honor of being the most British city in the three prairie provinces. Calgary ranks second with 78.1 per cent, and Brandon, in Manitoba, third, with 73.5 per cent.

Horses Run Quickly

According to statistics, a horse runs three times as fast as a human being; the records show that in running one mile a man requires four minutes and 10 seconds, while a horse does it in only one minute and 30 seconds.

Memorandum—A little note you write on a pad to make yourself wonder next day what you meant by it.

Little Helps For This Week

"I have finished the work which Thou gavest me to do." John 17:4.

He who God's will has borne and done, And His own restless longings

What else he does or has fore-gone, His mission he has well fulfilled.

Cheered by the presence of God I will do at each moment without anxiety and according to the strength He has given me, the work that His Providence assigns me. I will leave the rest without concern, it is my affair. I thought to consider the duty to which I am called each day as the work God has given me to do, and to apply myself to it in a manner worthy of His glory, that is to say, with exactness and in peace. I must neglect nothing.—Francis

It is thy duty oftentimes to do what thou wouldst not, thy duty too to leave undone what thou wouldst do.—Thomas A. Kempis.

A Napoleon Museum

French Mission Dedicates House With Relics In Saint Helena

Longwood, the house at Saint Helena in which Napoleon died in 1821, has been inaugurated by a small French mission as a Napoleon museum. Housing the original fittings and many relics of the Emperor, the museum will be kept up by the French government, although very few tourists ever reach this island far off the steamship lanes.

In a simple ceremony, the tri-color was run up beside the Union Jack, and many relics of the British colonial officials, Commandant Macdonald, and the French army, formally inaugurated the museum.

Many of the relics which it now contains are the gift of Alfred Day Carden, of New York, and his wife, who possess the greatest private collection of Napoleon souvenirs in existence.

An Original Idea

Australian Has Plan To Make "Going Broke" Easier

Proposing a new plan for making "between-paydays" easier, a man recently placed the following advertisement in a Melbourne, Australia, newspaper: "Gentlemen who gets paid on Thursday and who is usually broke by Saturday will exchange small loans with a person who is paid on Saturday and is not broke until Thursday. References asked for and given."

Personal and Local

Born: To Mr. and Mrs. J. Brennen, May 24, a son.

Born: To Mr. and Mrs. A. L. Watkins, of Edmonton, formerly of Coleman, a daughter.

Many die at 30, but are not buried till 60, states an exchange. True enough!

This is Editor Bartlett's winning year. He won the Grand Union pool on the Rose-McLarnin fight.

Adding machine rolls 80c each at Journal office. Also useful for telephone memorandum rolls.

Mrs. A. Malcolm of Lethbridge is the guest of Mr. and Mrs. C. Rogers this week.

Blairmore is planning on holding its annual athletic sports and track meet on July 2.

Rev. Roy Taylor returned from the conference of the United Church of Alberta held at Edmonton May 21 to May 28.

Mr. and Mrs. F. G. Creegan and children left on vacation Wednesday May 23. They are visiting friends at various prairie points.

Mr. and Mrs. J. Howarth and son John accompanied by Mr. and Mrs. J. Lonsbury motored to Eureka, Montana on Victoria Day.

Miss Margaret McDonald returned on Sunday from Edmonton, after attending university during the past year.

Mr. and Mrs. J. McNab and daughter of Lethbridge were visitors at the home of Mr. and Mrs. J. Hopkins Sr. on Wednesday of last week.

The wickets at the post office will remain open for one hour only on June 4th, the King's birthday, from 8.30 to 9.30 a.m. The lobby will be open to the public until evening.

Senior vice-president Grant Hall, C. P. R., passed through Coleman shortly after 7 p.m. Tuesday heading west on a tour of inspection. Several other road officials accompanied him on his special train.

The Italian Society is planning a grand dance in their hall on Monday, July 2, to which the public is cordially invited. Arcadians orchestra has been engaged. Keep it in mind for the holiday.

Regular meetings of the town council and school board were held on Tuesday and Wednesday evenings. Teachers contracts were terminated by thirty days notice being given, and applications for re-engagement will be taken up.

Coleman Red Sox met with a crushing defeat at the hands of the Bellevue nine in the baseball tournament held in Cowley on Victoria Day by a score of 15-2. It is reported that Angelo's team were seen at their worst, not being able to do anything right.

"This is the hardest day's school of the year," sighed several teachers on Monday when the heat and dust made the atmosphere too warm to be pleasant at the school sports. To the children it was one grand day.

Ira S. Clark, assistant S.K.R.S., Knights of Pythias, of Minneapolis, and A. E. Hartley, supreme representative for Alberta, were visiting the lodges in the Pass towns this week. A grand rally was held at Hillcrest on Wednesday evening.

Exceptionally hot weather has been experienced throughout Alberta during the latter part of May, causing considerable anxiety among farmers and those dependent on grain growing. Whatever profit there may be in rising wheat prices, unfortunately it is not the farmer who gets the benefit.

Mary Snider and A. Destobel were the high point scorers for Coleman in the school sports held in Blairmore this week. Mary captured four firsts for a total of 20 points while Destobel captured two firsts and two seconds for a total of 16 points. It is reported that they will receive bronze medals, with Mary Snider in the running for the silver medal given to the best all round athlete at the meet.

E. G. Quick, publisher of the Plaindealer, Youngstown, accompanied by his wife and mother, were visitors in town on Saturday. From here they went to Kimberley B.C., where Mr. Quick is considering entering partnership with E. F. Gare, who recently sold his poultry ranch at Cloverdale, B.C., and plans on again taking up the newspaper and printing business. Mrs. Gare and two children have been staying with Mr. and Mrs. T. Flynn during the week.

Coleman Schools Make Good

(Continued from Page 1)

George Cruickshank, M. L. A. was in charge of the "special police" engaged to keep the track clear, and W. Chappell was official starter.

Mary Snider of Coleman captured four first prizes in the morning; the 60 yards race; standing broad jump, 6 ft. 10 in.; high jump, 4 feet; running broad jump, 13 ft. 4 in.

In high jumping Coleman boys showed up well against more experienced competitors. Scott Campbell and Bob Emmerson being the outstanding competitors from Coleman.

It was a full day's program, and the hottest day of the year with the temperature around the 80 mark.

DUPLICATE RECEIPT BOOKS 100 Original and 100 Duplicate sheets in each book, size of receipt 3 1/2 in. deep, 8 1/2 in. wide. 50c each at The Journal Office.

Fined for Trespassing

Seven men and three women were charged with trespassing by walking on the C.P.R. tracks, between town and East Coleman and also West Coleman. Fines of \$2.00 and \$5.00 costs in each case were imposed by Magistrate J. E. Gillis this morning.

Three men declined or were unable to pay the fine, and were sentenced to ten days in Lethbridge jail. It is the intention of the C.P.R. police to prosecute all who trespass, in order to eliminate risks of accidents on the tracks.

Coleman Homing Society

In the pigeon race from Bow Island on Sunday, Jack Sudworth's bird was first home. Several fanciers are in the running for second place but checked times of birds have not yet made up for publication by the secretary. Members who are entering birds in the season's races are C. Makin, W. Harrison, J. Anderson, T. Jackson, W. Pryde, A. Beigum, C. Roughhead, F. Beddington, J. Claes, E. Raymond, J. Sudworth.
